Annual Sports Day Held On July 2 Unqualified Success

Large List Of Events Run Off

The Dominion Day Celebration held on Monday, July 2nd, was an unqualified success. The weather was kind, though showers threatened several times during the day, no real down fall occurred and the different lines of sports were carried through without interruption. The celebration opened with a school parade from fifth avenue to Main Street to the Fair Grounds. The Wainwright Town Band led the parade and made a classy showing in their natty white uniforms, following the band came the children happy in the spirit of freedom, not only in the prospect of a day of fun but so recently liberated from school duties.

A fine array of floats and com. makeup followed in the procession. Not least of the attractions was the display of floats which the local dealer Art Dupre had in the parade.

Winners in the parade were as follows: Best Fancy Dressed Car, 1st, Garrell; 2nd, Alma Meat Market and 3rd, W. T. Brunker.

Commercial Floats: 1st, Ogilvie Flour, C. G. Murray; 2nd, Home Industry, N. Ricker; and 3rd, Rudd & Patterson.

Comic Floats: 1st, When You and I Were Young, Maggie, E. Donovan; 2nd, From Missouri to Wainwright, Old Fields, E. Carl.

Comic Individuals: 1st, Spark plug, B.E.S.L.; 2nd, Clowns & Bunking Horse, S. and E. Murray; 3rd, Clowns, R. Carl.

Special Class, 1st, Travelling Circus, L. Green and L. and M. Jackson.

The baseball and other games played on the grounds gave the crowd plenty of first class entertainment even though the Giant Glens failed to put in an appearance.

Seven baseball teams took part in the competition: Coal Springs, Hughtenden, Irma, Chauvin, Ribstone, Wainwright and the Wainwright Old Timers.

The games played resulted as follows: Coal Springs vs Wainwright won by Wainwright; Hughtenden vs Red Star, Irma, won by Hughtenden; Old Timers vs Chauvin, won by Chauvin; Ribstone vs Hughtenden, won by Hughtenden; Chauvin vs Wainwright, won by Wainwright and in the finale, Hughtenden vs Wainwright, was won by Wainwright with a good lead.

The softball diamond attracted its share of the spectators, where some real games were played. The teams competing were: Royston, Chauvin, Cappy Kidd's Pirates, Irma and Wainwright High School.

The results were as follows: High School vs Royston, won by Royston; Cappy Kidd's Pirates vs Chauvin, won by Pirates; Royston vs Chauvin, won by Royston and in the finale, Royston vs Chauvin, won by Royston.

As a real finish to the soft ball play, Vernon Wiley's "Midgie" played Vivian Wittman's "Lilliput."

Wedding Bells

ADAMS - OLSON

A pretty but quiet wedding took place at the United Church Parsonage, Rev. T. Edgar Armstrong, officiating, on Wednesday, June 27, 1934, when Miss Jennie Marie Olson, of Gilt Edge, became the bride of Fredrick Huron Adams, also of Gilt Edge.

The bridesmaid was Miss Lilly Ivy Olson, sister of the bride, and the groom was supported by his brother, Frank M. Adams. Only the immediate families of the contracting parties were present.

Following the ceremony the happy couple left to spend their honeymoon at Laurier Lake.

The Record joins their many friends in wishing them health and happiness in their new home.

Farewell Party To Gilt Edge Prominent Citizens Hall Burned

The members of Wainwright and Gilt Edge Loyal Orange Lodge and Wainwright L.O.B.A. gave a farewell party to Brother and Sister Montgomery at the Masonic Hall on Friday evening, June 29th.

The evening was spent in playing cards and carpet bowls, after which a delicious lunch was served by the ladies of the L.O.B.A.

After lunch, Brother and Sister Montgomery were presented with a small token of remembrance by the L.O.L. and L.O.B.A.

Both Brother and Sister Montgomery will be greatly missed in this district by their many friends.

On Friday night, or Saturday morning to be exact, fire of unknown origin destroyed the community hall at Gilt Edge.

There had been a meeting held in the hall on Friday night, which dispersed about 11:00 p.m. At about 2:30 a.m. Saturday morning, Ed Plaxton was returning from town and saw the fire which had advanced to such an extent at that time that the roof had fallen in.

The building with contents is a total loss, partly covered by insurance. Plans are underway for rebuilding soon. Not so long ago the L.O.L. Hall not many miles away was also consumed by fire of unknown origin. It has not since been rebuilt.

The Gilt Edge Community Centre is to be held on July 29th. There will be horse races, basket ball, soft ball and baseball.

Admission 25 cents.

Bring your basket for lunch, or if preferred you may secure lunch on the grounds for 25 cents.

There will be a big dance in the evening.

Wainwright L.O.L. Church Parade

On Sunday, June 24th, the L.O.L. No. 3086, of Wainwright, held their annual Church Parade from the Masonic Hall to the Presbyterian Church. The service was well attended by the local members of both the L.O.L. and L.O.B.A., also by many visiting brothers and sisters from Irma and Gilt Edge.

Rev. Mrs. Brooker preached a real Orange sermon, tracing the history of the Order from the time of William, Prince of Orange, until the present day development of the organization.

During the afternoon special hymns were sung by those present and an anthem was rendered by the Choir with Mr. W. Carrell at the organ.

The Irma Lodge L.O.L. will hold their Church Parade to the United Church on Sunday, July 8th, at 5:00 p.m.

Sydenham News Items

Mrs. Owen Pigeon and infant son, returned from Edmonton last Thursday.

Mrs. F. Seabrook entertained in honour of Miss Armstrong on Wednesday. Misses Jean Seabrook and Jean presented Miss Armstrong with a gift after which bouquets were presented to Miss Armstrong, Mrs. Armstrong and Mrs. Seabrook. A dainty lunch was served. Afterwards there were several contests. The winners in these were: Mrs. Mabey, Mrs. Church, Sr., Mrs. Keen and Mrs. Croteau. The guests were: Mrs. Mabey, Mrs. Rute, Mrs. Goodiey, Mrs. Shearer, Mrs. B. A. Dixon, Mrs. McKay, Mrs. Alexander, Mrs. Croteau, Mrs. Peterson, Mrs. St. Peter, Miss Edith Merrick, Mrs. Glenn, Mrs. Stadsbaug, Miss Rono, Mrs. Kinghorn, Mrs. MacDonald, Mrs. Carl, Mrs. Brassard, Mrs. Church, Miss Woodward, Mrs. A. C. Woodward, Rev. T. E. and Miss Armstrong, Mr. Alexander, Miss Jean Dixon and Mrs. F. Church.

The fourth annual picnic of the Sydenham school was held on Friday in Mr. Baker's pasture. Despite the threatening clouds the weather was ideal. The children enjoyed the usual treats of candy, nuts and ice cream.

The Sports included a ball game between the school boys and the school boys who were winning when the ball played out. The various races were enjoyed by all and were won by the following:

Girls under 6-1st, Mildred Keen; 2nd, Irene Goodiey.

Boys under 6-1st, Raymond Boyd; 2nd, Maurice Brassard.

Girls under 9-1st, Pauline Dixon; 2nd, Eleanor Peterson.

Boys under 9-1st, Jimmie MacDonald; 2nd, Stanley Brassard.

Girls under 12-1st, Helen Fra-

lick; 2nd, Barbara Keen.

Girls under 15-1st, Jack Paul; 2nd, Herbert Keen.

Boys under 15-1st, Barbara Keen; 2nd, Olive Myer.

Boys under 15-1st, A. S. Stadsbaug; 2nd, Herbert Keen.

Open Race-1st, B. Paul; 2nd, J. Paul.

Sack Race-1st, B. Paul; 2nd, Claude MacDonald.

Boys 3 legged race-1st, A. Stadsbaug & Jack Paul; 2nd, A. Stadsbaug & B. Paul.

Girls 3 legged race-1st, Betty Keen & Olive Myer; 2nd, Vera Hausfeldt & June Keen.

Wheel Barrow Race-1st, Betty Paul & Harold Stadsbaug; 2nd, Jack Paul & Harold Peterson.

Girls' Shoe Scramble-1st, Jack Jones; 2nd, Barbara Keen.

Boys' Shoe Scramble-1st, Harold Stadsbaug; 2nd, Stanley Brassard.

Married Ladies' Race- Mrs. Carl. Married Men's Race- Owen Pigeon.

Porcupine Race-1st, Arne Stadsbaug; 2nd, Wilfred Croteau.

2nd Jump, boys under 10-1st, Claude MacDonald; 2nd, Wilfred Croteau.

Herbert Keen, 2nd, Pete Peterson.

Broad Jump, girls under 10-1st, Barbara Keen; 2nd, Edna Fralick.

Broad Jump, girls over 10-1st, Helen Fralick; 2nd, Barbara Keen.

Girls' Relay Race- June Keen, Pauline Dixon, Edith Merrick and Eleanor Peterson.

During the afternoon a kodak and a bat were drawn for and were won by Janet Croteau and Raymond Boyd.

The school closed at noon on Friday. Miss Armstrong returned to her home in Wainwright. The good wishes of the district go with her to her next school at Willowby.

Local Students Make Good Progress In Final Examinations

Listed From Grade 8 Down

On Friday, June 29th, the schools, both public and High, having finished their years work by a course of examinations, joyfully took their books from their rooms and departed for home conscious that for two months at least they did not need to care when the nine o'clock bell rang, or whether they remembered anything of all the subjects they had been studying for so long.

The teachers departed, some for their homes, others to continue studies at summer school, but all glad that the daily grind had been completed.

As a conclusion to the years association together the High School gave a dance on Thursday evening in the L.O.O.F. Hall which was well attended by the young people, who felt at liberty now to indulge in "night out", as they had no more hard lessons to occupy their pleasant evenings.

We give below a list of the public school promotions. The names are not listed in order of merit.

Local Bakery Change

Another interesting change in management of local business place last week when the B.A. Business opened and operated for many years by Thomas Billing was transferred to Vic Cowley, of Biggar, formerly of Hardisty.

Mr. and Mrs. Cowley and son took possession of the Bakeshop on Monday of this week and will occupy the north store front as a store and salesroom.

Mr. and Mrs. Billing will for the present continue to operate the ice-cream parlor and restaurant.

Mr. Cowley is a first class baker with many years experience and will be turning out bread and pastry of all kinds to meet the taste of the most fastidious.

The Record respects for Mr. and Mrs. Cowley the support of all the town and district and hope they may have success in their new location.

HOPE VALLEY NOTES

Mr. Tom Smith is away at Calgary with the soldier boys for a couple of weeks.

The Maple Leaf girls had a softball practice Tuesday.

They played a game with the Gilt Edge girls at Gilt Edge Park on Wednesday night. The game was very exciting and resulted in a victory for the Gilt Edge team.

Mr. and Mrs. M. H. Pugh spent Sunday with Mr. and Mrs. W. H. Roach.

The Gilt Edge baseball boys won a game from the Maple Leaf Sunday. It is reported that the Gooseberry boys handed the "Spokane" Club ball team a taste of the "raspberry" on Sunday.

Miss K. Knott is spending a week with her sister, Mrs. M. James.

Mr. and Mrs. A. Gibson and Dorothy, were guests of Mr. and Mrs. J. Sewell on Sunday.

Mr. and Mrs. Potts, of Edmonton, visited Mr. and Mrs. M. C. Rulke Sunday.

We hear that a sea serpent has been seen in the Battle River. Here's a chance for "Scottie" to play St. George on the Dragon.

Object-Lesson Of Peace

Whatever may be the individual reaction to customs houses as between Canada and the United States, there is general unanimity upon the world wide of the lesson presented by the unique fact that not a gun nor a fort stands as provocation between the two countries throughout the whole extent of the international boundary.

This is so phenomenal a situation that it has attracted universal attention, been the subject of thousands of after-dinner and more serious addresses, and stands to-day in a belligerent world as a supreme example of what understanding and goodwill can do to preserve the peace of an immense borderline, to cement friendship between two great branches of the Anglo-Saxon family.

For more than 100 years, peace has existed between the Canadian and American peoples, and it is almost inconceivable that any set of facts or factors could disturb the serenity of the relationship existing between the nations north and south of the boundary line.

That goodwill and understanding has been of almost incalculable benefit to Canada. Billions of dollars of American money has been invested in this country; hundreds of thousands of American people have come to settle in our midst. That money has helped materially in the development of Canada; those people have contributed their share to the upbuilding of a great dominion of the British Crown. Together they have helped to achieve that economic diversity upon which Canada has been able to build its economic fabric on a national scale. These facts are evidence of the confidence with which the people of the sister country view their neighbors to the north and testify to the keen appreciation they have of the solidarity of British institutions and British forms of government.

The unique and signal character of this unfortified frontier, the amity between the two close economic relations which seem to stand superior to race rivalries, have attracted attention of the Carnegie Endowment for International Peace, which proposes now to make a special study of the factors lying behind a situation which stands as an impelling object-lesson to peoples of the globe.

Whether or not any definite conclusions can be reached, whether or not a tangible cause can be deduced from the obvious facts, which might be made applicable as a general world principle, remains to be seen. The fact stands in their amazing isolation—peace, goodwill, and understanding are better weapons of defence than all the guns ever forged and all the forts ever built.

Superficially, at least, it would appear the fundamental background to the phenomenon is of the spirit, and for that reason, too intangible to lend itself to any concrete definition or to be written into any formula for use of peoples who, similarly situated geographically, remain to get along together.

Whatever the finding, the lesson stands for the world to view—an irrefutable proof of what two nations may do if they have the will to live in peace and amity, convincing evidence that, demonstrating their mutual goodwill by dispensing with the so-called weapons of the defence, neighbors live in harmony without incurring those conditions of the mind or of the politics, which lead to war.

Working Of The Brain

Currents To Stop Limited Area
University of California
at used high radio currents the functioning of limited of the brain without interfering with the other parts, to study the processes of particular centres of the brain, was described to the American Association for the Advancement of Science.
This somewhat startling method of probing the functional workings of the brain was based on the research of Dr. Clarence W. Brown of the university's psychology department.
Dr. Brown suggested his method of brain study should prove serviceable in solving anatomical and psychological problems in which a small controlled elimination of function is desired.

Fixed Price For Tobacco Growers

Imperial Tobacco Company of Canada Limited Signs Tobacco Growers' Agreement
Gray Miller, president of the Imperial Tobacco Company of Canada, Ltd., states that "The Ontario fixed tobacco growers are now practically assured for 1934 a price based on 27c per lb. for an average crop. Although we are still without any assurance that other manufacturers will follow our lead, we have now agreed to meet the request of the growers for a 27c average price, and we have given them our definite undertaking in writing to adhere to that basis for the 1934 crop, provided they can secure an agreement from the other manufacturers to pay the same price."

Looseness Of The Bowels During The Summer Months

It is seldom, during the summer, that most people are not troubled with some form of looseness of the bowels. Generally it develops into Diarrhoea, Dysentery or Summer Complaint, and has a tendency to weaken the system.
Do not check the discharges too suddenly.
Do not experiment with a new and untried remedy, Do not accept a "Fowler's Extract" remedy, a remedy that has been used by thousands of families during the past 88 years.
Do not accept a substitute. Be sure and get "Dr. Fowler's" when you ask for it.
Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Modern War Implements

Britain Installing Rapid Fire Gun In Fighting Planes

A big gun era begins in aerial warfare. A 37-millimeter, rapid fire, automatic gun is being installed in some of the larger fighting planes of Great Britain, and promises to have a "tremendous advantage" over an opponent carrying only the ordinary machine guns.
The heavy gun shoots more slowly, sending out its messengers of death at the rate of only five in four minutes. But each shot weighs a pound and a half and is considered certain to disable any plane however lightly the contact is effected. And the slow-shooting heavy gun trusts to its long range to give it victory over the nimble. The small, light plane with its sputtering machine gun is never to be permitted to come within effective range.

The report says: "Excellent results at both ground and air targets have been obtained at 7,000 yards." Presumably that gives British air fighters a fine start over all competitors in the armament race. But the presumption limps before the announcement that the new device was developed by experts connected with one of the great armament manufacturers whose trade always has been international.

And even if the British government seizes complete control of that particular make, it can be certain that shortly after the usefulness of the invention has been demonstrated, arms makers of other nations will be out with guns for airplanes that can shoot shells just as big, just as far and perhaps just a little faster.—Detroit News.

Praises Missionary Efforts

Dector Credits Christianity With Great Progress In Asia

The change which Christianity worked in the conditions of millions of women, and the part which Christian women took in working these reforms was the theme of an address at Highclere, Southcote, of Dr. J. Mott, president of the World Missionary Council, at a meeting of women workers of all Christian denominations.

The effect of Christian missions upon the lives of women would be sufficient evidence, he said, to convince him of the worth of foreign missions. An additional argument lay in the devotion and the achievements of Christian women in the missions.

To thousands of women in heathen lands the relief brought by the medical missions, the establishment of hospitals, and the creation of nursing services had been immense. Women took the lead and did the greater part of the work in this field of service. It might be said that Christian missions had created the medical profession throughout Asia.

Fortune Has String Attached

Man Must Marry By Christmas 1934 To Inherit

If John Francis Gallagher, of parts unknown, takes up his abode in Canada or before Dec. 25, 1934, and settles down to home life he will receive £100,000 from his aunt, Mrs. R. Zarah, 143 Well Hall Road, Eltham, London, Eng.

The offer of wealth was disclosed when Mrs. Zarah to Acting Mayor J. A. McKercher of Winnipeg. She said she was obliged to make a public appeal as to her nephew's whereabouts because she had lost all trace of him several years ago.
Mrs. Zarah, in her letter, said the last address she had of her nephew was box 130, Carbon, Alta., and general delivery, Prince Albert, Sask. If Gallagher is not located and married by the date set, Mrs. Zarah said she would bequeath all her real and personal property to the church and charity.

Cost Of Farm Production

Dominion Agricultural Bulletin on prairie farm costs, says: A half-section grain farm in the prairie provinces, when operated by one man and seven horses would be able to produce wheat at 79.5 cents per bushel, while, when operated with a 10-hp. tractor and two horses, the cost would be increased to 85 cents per bushel.

Proved Idea Wrong

Remarkably vigorous tomato plants have been grown out of doors at Fairbanks, Alaska, under continuous daylight for six weeks, despite the reports that daylight artificial, or artificial and daylight exposures of 17 hours or more are injurious to tomatoes.

Obligate plants are plants which can grow in but one life condition.

Synthetic Rubber

Automobile Tires Now Made In U.S. From New Substitute

The first American synthetic rubber automobile tires which look like real rubber and wear fully as well, were announced recently.

They were described as a potential checkmate against excessive rubber prices and a guarantee of American rubber independence in war-time. The synthetic rubber now costs about \$1 a pound, against 15 cents for foreign real rubber, which has ranged from five cents to more than a dollar.

The announcement was made jointly by the Dupont Company, makers of the synthetic rubber, and the Dayton Rubber Manufacturing Company, of Dayton, Ohio, making the tires.

The synthetic rubber is made of acetylene, salt and water. The acetylene comes from coal and limestone, so that all the ingredients are home products.

T. A. Macmillan, president of the Dayton company, issued this statement:

"These tires have been subjected to rigid laboratory and road tests and have proved themselves fully the equal of tires built of natural rubber. They have been placed on automobiles opposite tires built of natural rubber and have been subjected to severe usage."

Use Of Radium

Dr. Shepley Deals With Advance Made In Use Of This Medium In Recent Years

"It is definitely recognized to-day that the scope of radiotherapeutic attack has so widened that it now embraces a very large per centage of the total cancer field," Dr. Earle E. Shepley, radiotherapist for the Saskatchewan cancer commission, of Saskatoon, told delegates to the Canadian Medical Association at Calgary. His paper dealt with the advances made in the use of radium as a therapeutic agent since its discovery in 1910.

"Because of late recognition," Dr. Shepley said, "a large per centage of cases of cancer cannot be considered from the viewpoint of curative attack. In those that have been given curative treatment procedures, possibly not more than one-third are cured. From these groups, a large number require palliative radiotherapy." This is a matter of importance because such procedure reduces suffering, even if not effecting a cure, Dr. Shepley explained.

Will Regulate Tariffs

Dr. Showell Explains Powers Given To Roosevelt

Economic problems, including tariff questions, would be more smoothly adjusted between Canada and the United States as a result of the powers to regulate tariffs given to President Franklin D. Roosevelt, Dr. James T. Showell, former Canadian representative of the United States at the peace conference in 1918 and at present professor of history at Columbia University, New York city, told the Ottawa Canadian press. Formerly, these powers were the prerogative of the United States congress.

Tariffs, under executive decree, would operate without the intrusion of political prejudices formerly seen, Dr. Showell said. His audience included Prime Minister R. B. Bennett, Sir Robert Borden, wartime premier and Rt. Hon. Mackenzie King, former prime minister and Liberal leader in the House of Commons.

Gold In Canada

Gold is found in every province of Canada except Prince Edward Island, and in point of value it ranks with coal as the two most important mineral products of the Dominion, states the Department of Mines, Ottawa.

"Minnow" submarines weighing only 13 tons and measuring 20 feet in length have been Japan successful undersea tests in Japan.

In English law, a bailiwick is the district within which a sheriff may exercise jurisdiction.

Improves cooking

Automatic Gave Minister From India Lots Of Trouble

Rev. Elbert M. Moffatt, central treasurer of the Methodist Episcopal Church in India, was a badly troubled man when he arrived from Europe on the liner American Trader, with a 45 calibre automatic revolver.

The automatic became a source of trouble to Mr. Moffatt before he left Bombay. The weapon was taken there by a bishop's sister, whose American friends felt she would need something to protect herself when she was so far from genteel Oklahoma.

It is, however, illegal to have a pistol that is not registered by the police in India. And the police refused to register the pistol because its bore was the same as that of theirs.

The bishop's sister appealed to Mr. Moffatt to take the pistol back to the United States when he sailed.

He did it in his possession for two weeks before he left India with his wife and their children. And the police kept a constant watch on him, which was most embarrassing.

When he arrived in the United States he listed the pistol on his customs declarations. The customs agents said they were not interested. He felt relieved that he was not violating any law, but the helpful customs agents said: "While the pistol does not violate our law, it violates the New York State law, of course."
Mr. Moffatt threw up his hands. "I am," he said with determination, "taking it to the nearest police station."

A Miracle Of Speed

Nineteen Girls In London Factory Make Shift In Minute

Those who refuse to believe that a shift with all its stitching, trimming, button-holing, and so forth, can be made in one minute, should go to a building in London, and see nineteen girls, seated at nineteen tables, separated into two blocks, by a moving conveyor, performing this miracle of speed. Each girl performs one operation. One sews cuffs, another makes collars, another buttons holes. All the time shifts in various stages of completion are moving with the conveyor from one table to another. At full pressure the minute can be reduced, it is said, to fifty-five seconds!

Gift For British Admiralty

Charles Courtney, master locksmith, arrived in London from the United States and said he would present to the Admiralty certain rings and articles of wearing apparel belonging to the late Lord Kitchener. Courtney said he saved the articles from H.M.S. Hampshire, the ship which carried Lord Kitchener to his death while on an official mission during the war.

Husband Needed Sympathy

In granting a divorce to a talkative woman at Toledo, Ohio, Judge James Austin explained that it was given "as a favor to her husband." Mrs. Northerta V. Mueller could not be stopped by judge, attorneys or bailiffs after she began a recital of her domestic affairs. The husband did not contest the action.

Population Of India

Showed Increase Of Thirty-Four Million In Ten Years

Dr. J. H. Hutton, C.I.E., I.C.S., chief commissioner for the census of 1921, in his census report wrote that for long China was considered to hold the greatest aggregate of human beings in the world more or less under the same administration, but India's population now even exceeds the latest estimate of the population of China. The difference between the kind of government China has had during the present century and the kind of government that India has had could not be better illustrated.

The census of 1921 gave India a population of 353 millions or an increase since 1921 of just under 34 millions. The increase in the 'ten years from 1921 to 1931 is alone almost equal to the total population of France or Italy and much greater than that of important European powers like Poland and Spain. If there was an increase of 34 millions between 1921 and 1931, a similar or even greater increase between 1931 and 1941, bringing India's population almost up to the 400 million mark which is envisaged by Sir John Megaw, cannot be dismissed as impossible.—Calcutta Statesman.

Kept Old Appointment

Friends Meet In Denver On Schedule After Twenty Years

Three men entered the office of a Denver newspaper promptly at 11 o'clock on a recent morning to keep a rendezvous made 20 years ago. The trio consisted of Earl E. Anderson, of El Centro, California, H. H. Bromley of Denver and F. A. Donk of Rocky Ford, Colorado.

They explained that one night in 1914, while all were living in Denver, they made an appointment to meet in that particular building a score of years later.

PROPOSALS MADE FOR CHANGES IN ELECTION ACT

Ottawa.—Support to the suggestion that persons not voting should be struck from the voters' lists was given by Hon. Charles Stewart, Liberal representative from Edmonton West, in discussion of the Election Act.

Hon. Hugh Guthrie, chairman of the special committee, after discussing amendments, stated one remaining for consideration was "the point as to if a person does not vote should he be struck off the voters' list?"

"I am in favor of that," said Mr. Stewart. Anything that would place a responsibility on the voter to record his ballot should be provided, he held. Both Mr. Guthrie and Hon. Ernest Lapointe seemed to agree the provision would be going too far, the present and former ministers of justice contended. "I will move it before the house," said Mr. Stewart.

Any Dominion by-election before discussion of the present parliament will be held under the present Election Act. An amendment to this effect was approved at a second meeting of the special committee. In amended form, the act respecting the election of members and the new franchise bill, likewise with alterations, will be reported to the commons.

Closing its deliberations, the committee heard brief suggestions for the proportional representation system of voting and the transferable vote.

As sponsor for proportional representation, William Irvine (U.F.A., Witsandwin) agreed he would be subject before the commons. It was decided unanimously the special committee would not go into the merits of the proposal.

The transferable vote would require "much attention" before it could be brought into operation, Hon. Hugh Guthrie and Hon. Ernest Lapointe, former minister of justice, concurred.

A proposal a clause be inserted to cover absentee voters was made by A. W. Neil (Ind.-Comox-Alberni). It was decided Mr. Neil should draft a provision for consideration of the commons. The proposed clause, it was agreed, should cover fishermen, lumbermen, miners, prospectors and sailors more than 50 miles from their constituency. The amendment to be placed before the commons contemplates allowing such voters to place their ballots in the ridings in which they are located on election day. The results would be telegraphed to the home constituencies of the voters.

Chief Constable Resigns

C. H. Newton, Head Of Winnipeg Police Force, Retires After Long Service

Winnipeg.—Chris H. Newton, chief constable of the Winnipeg city police for the past 15 years, has resigned, and the reins with which he had guided law guardians of the city were in the hands of George Smith, chief of detectives.

Mr. Smith was appointed acting chief by the Winnipeg police commission after that body accepted the resignation of Mr. Newton. The resignation, tendered on June 13, was accepted with regret by the commission just one hour after discussion of the situation arising out of a charge of assault laid against the former chief by Joseph O. Erick, watchmaker.

It was stated the resignation was accepted with no other motive than the chief's desire to retire. He will receive a pension.

Mr. Newton, president of the Manitoba Cricket Association and prominent executive of the Chief Constables' Association of Canada, joined the Winnipeg police force in 1901 as a patrolman. His superior education and general ability brought him rapid promotion, until in 1919 he was appointed to the chief constable's post.

Defeat Divorce Bill

Ottawa.—The Stollard divorce bill will not receive further consideration by the House of Commons this session. A motion by E. R. E. Chevrier, Liberal member for Ottawa, to pass the bill which was defeated in the private bills committee, restored to the order paper, was declared lost. By the bill, Hyman Stollard, of Montreal, sought to obtain a divorce from his wife, Ruth Rudnikoff Stollard.

W. N. U. 2053

New Franchise Act

R.C. Doukhobors Will Be Debarred From Voting

Ottawa.—Rapid progress was made on the new franchise act as the committee of the house considering the bill approved without division three amendments at a second sitting under the chairmanship of Hon. Hugh Guthrie, minister of justice.

"Doukhobors in British Columbia, where they are disqualified from voting in provincial elections under the British Columbia law, will not have the right to vote in Dominion elections under one amendment."

A second amendment struck out the provisions for a signed application by a prospective voter insofar as the original basic list is concerned. The provision for signatures will continue to apply to the annual revisions of the list.

A third amendment dealt with the appointment of enumerators in each riding. It provided one enumerator should be nominated by the sitting member of parliament for the constituency. The second enumerator will be nominated by the nearest opponent to the successful candidate in the last general elections.

A. W. Neil (Ind.-Comox-Alberni) appeared to ask that provision be made for the taking of the absentee vote as under the British Columbia Elections Act.

Boys Start On Tour

Famous Kitchikano Band Will Sail From Montreal For England

Vancouver.—Canada's champion junior band, the Kitchikano Boys' Band, of Vancouver, has left here en route for a two-months tour of England before returning home. At least one of the 45 youthful musicians plans to remain in the Old Country if his hopes are realized.

Norman Pearson, tall, fair-haired, 18-year-old trumpeter, who, besides winning many awards for his music has established himself as one of the Dominion's foremost cricketers, will attempt to realize his ambition when he reaches England—to play in first class county cricket there.

Pearson, despite his youth, has compiled a record in two months of play this season that is believed unequalled in Dominion record books. During that time he knocked up five centuries, passed the two-century mark once, and scored a total of 1,023 runs. His high score was 221 runs. And to make his record more remarkable, three scheduled games were rained out.

Concerts are being given en route at all the larger cities on the prairies and in eastern Canada. The party will sail for England from Montreal on the Duchess of Athol.

Casualties At Rodeo

London.—The score of Tex Austin, 18-year-old troubadour, who, besides injured and one steer allegedly trampled, Rusty Coram, famous broncho buster of Camargo, Okla., suffered a broken leg when a bucking horse fell on him. He was taken to a hospital, the fifth cowboy injured since the rodeo began two weeks ago.

Loan For Winnipeg

Winnipeg.—Premier John Bracken announces arrangements have been made by the Manitoba government to loan the city of Winnipeg \$13,000 to cover the city's cost of unemployment relief during 1933. The loan was made possible by the Manitoba government borrowing from the Dominion government.

Trade With Great Britain

Toronto.—"We intend to establish close trade relationship with Great Britain and all other countries," Hon. Henry T. Ralney, speaker of the house of representatives of the United States, declared here.

Farm Debt Adjustment

Senate Frowns On Bill And Carries Amendment

Ottawa.—Provision in the government's farm debt adjustment legislation whereby a mortgage costing a farmer in excess of seven per cent. may be liquidated on payment of the principal and three months' interest unless the mortgagor desires to continue it at a rate of five per cent. was frowned upon by the senate banking and commerce committee.

It was held this would make it impossible for farmers to secure mortgages. An amendment was carried unanimously making it possible for the mortgagor to hold his contract, when so challenged, by reducing the rate to seven per cent.

The committee proposed only one other amendment. A provision that would allow the governor-in-council to appoint an official receiver only in such counties as would be deemed necessary and expedient. The bill was reported for third reading as amended.

JAPANESE MOB MAKE ATTACK ON BRITISH POLICE

Shanghai.—An angry crowd of 300 Japanese attacked British police of the Shanghai international settlement before dawn, hurling bricks, bottles and clubs at them.

The affair threatened to precipitate an international incident. The British authorities had sought to arrest two Japanese sailors ashore in international territory.

The Japanese, styling themselves "patriots", objected to a Briton detaching to arrest one of their countrymen and quickly assumed an ugly mood. Missiles began to fly. Japanese naval shore patrols and British police reinforcements quickly ended the affair, which for a time threatened to assume proportions of an armed clash.

High Japanese naval authorities and British international settlement police officers finally intervened to prevent a pitched battle, although numerous British policemen were struck by bricks and other weapons hurled by the Japanese.

The British policemen, who attempted the original arrest, claimed that two Japanese sailors struck a Chinese woman, making it necessary to take them into custody.

Japanese naval representatives insisted the police of Shanghai had no authority to arrest Japanese sailors. Police refused to accept the Japanese attitude, pointing out other nations maintaining naval or military forces here recognized police authority on shore. They pointed out that when called upon to handle any service man, they immediately hand him over to his own command following the arrest.

Takes Tea With Queen Mary

Mother Of President Of United States Entertained At Buckingham Palace

London.—Two of the world's most talked about women—Queen Mary and Mrs. Sandro Delano Roosevelt—sipped tea together in Her Majesty's private apartments at Buckingham Palace.

King George was present, but most of the animated conversation was carried on by Her Majesty and the mother of the United States president.

Just two mothers—grandmothers in fact—they found many common interests as they chatted. Their majesties were impressed by the gaiety, friendliness and frankness of Mrs. Roosevelt.

MAY COME TO CANADA

The health of Premier Ramsay MacDonald is the chief concern of the people of the Mother Country at the present time, as his physicians demand that he take a rest. Mr. MacDonald must take at least three months' rest, and it is thought he may make a trip across Canada.

Relief Cheques

Payment Of Dominion's One-Third Proportion Is Authorized

Ottawa.—Cheques in varying amounts from less than \$100 to \$337,231 as the Dominion's one-third proportion of provincial relief operations, were authorized by order-in-council tabled in the House of Commons. The amounts authorized included:

Alberta—\$77,681.
British Columbia—\$207.
Manitoba—\$3,672.
Saskatchewan—\$44,614, municipal and direct relief expenditures under 1933 act, to be credited to the \$500,000 loan made by the Dominion to Saskatchewan, November 24, 1933.
For provincial works under 1933 act—\$1,066. Municipal direct relief under 1933 act—\$63,920. Municipal direct relief under the 1932 act—\$790, to be credited to the Dominion's loan of \$500,000 to Saskatchewan dated January 6, 1934.

Investigation To Continue

Probe Into Price Spreads Will Be Carried On

Ottawa.—The price spreads and mass buying probe will be continued during the summer, it has been learned definitely.

The committee of 11 members of parliament conducting an inquiry since the middle of February is expected to be turned into a commission to continue the investigation.

In a brief report being prepared for tabling in the House of Commons, this recommendation is likely to be made in the present report. Practically all the sittings of the commission will be held in Ottawa, although there is a possibility the body may visit the maritime provinces late in August to hear evidence on the fishing industry on the Atlantic.

Tax Will Be Collected

Ottawa.—Provisions for the collection of five per cent. income tax from private trusts set up in Canada for the benefit of non-residents were placed in the amendments to the Income War Tax Act which were finally passed through the House of Commons. All clauses in the income tax measure had been passed previously but some question arose over the taxation of these private trusts.

To Visit Dominion

Reported That Ramsay MacDonald Will Holiday In Rocky Mountains

London.—The Daily Herald states that Prime Minister Ramsay MacDonald has "practically decided" to spend his long vacation from official duties in Canada, including in a walking trip through the Rockies.

A projected trip up the Amazon river in Brazil was rejected, the Daily Herald said, on account of the intense heat. Friends of the prime minister locked with disfavor upon his suggestion of spending the three-months health-seeking vacation in Newfoundland.

Internal politics in Newfoundland might worry the work-worn premier, he feared. The newspaper reported that a long sea cruise was rejected on the grounds Mr. MacDonald would spend much of his time reading. He has suffered a great deal from eye strain during the last few years.

The visit to the Canadian west was finally proposed as affording the best possible rest for the premier. It was not stated who would accompany Mr. MacDonald but his daughter-Innabel was believed almost certain to go with him. She has accompanied her father on all his trips away from England.

High Price For Telephone

Mukden, Manchuria.—Telephones are so scarce and hard to get in Mukden, because of the growth of the city, that fabulous prices are being paid for telephones being relinquished by established subscribers. A Japanese building contractor has just paid the record price for a telephone connection—1,250 yen. This is equal to nearly \$400 in Canadian money.

May Reduce Radio Licences

Toronto.—The Globe, in a special despatch from its Ottawa correspondent, said it understood proposals were before the special House of Commons commission on radio that might result in a reduction in the license fee for receiving set owners from \$2 to \$1.50 or \$1.

STATE OWNED BANK MOTION MEETS DEFEAT

Ottawa.—Liberals and Progressives made one more attempt in the House of Commons to gain public ownership for the new Central Bank but ran afoul of parliamentary rules and failed. Speaker George Black ruled three motions out of order, declined to receive a fourth and when the house rose had another under consideration.

Hon. Ian Mackenzie, Liberal member for Vancouver Centre, moved the original motion—to refer the bank bill back to committee with instructions to consider a Central Bank owned or controlled by the Dominion or both owned and controlled by the state. The speaker agreed with Premier R. B. Bennett this was too ambiguous and was upheld by the house 98-72 with Conservatives pitting their strength against Liberals and Progressives.

William Irvine (U.F.A., Witsandwin), a few minutes before, moved to send the bill back with definite instructions to recast the bank from a private to a publicly-owned institution.

When the Mackenzie motion was ruled out, the Irvine motion went out as well.

For a few seconds the house was in confusion, with nothing before the chair except the motion for third reading. Pierre Casgrain, chief Liberal whip, and George Coote (U.F.A., Macleod) both stood up together. The Liberal secured the speaker's eye and moved still another motion for public ownership but it met the same fate as the others. The United Farmer, apparently disheartened, took his seat. The closing hour precluded judgment from the speaker.

Premier R. B. Bennett led the fight against public ownership, painting a picture of a Central Bank dominated by political control and patronage. The government, he said, had drafted every provision against outside pressure and "we believe we have placed on the statute books of this country as good, if not better, legislation than any other country in the world."

BRITAIN WILL NOT PAY WAR DEBT TO U.S. IN GOODS

Washington.—A British reply that Great Britain was not prepared to make partial payment of its debt in goods and services was received by the state department without comment.

The formal note, delivered to the state department by D. G. Osborne, charge d'affaires, rejected overtures made by Secretary Cordell Hull in a note of June 12.

The British note said the experience of German reparations had shown that transfer of goods was as unsettling to world economic affairs as transfers in cash and could not be entertained by Great Britain.

The British note emphasized that the primary question for settlement was the amount that should be paid. In administration circles that declaration was considered as making clear that Great Britain had notified this country, in effect, that it would make no payment of any kind until the present debt funding agreement had been revised downward.

Secretary Hull's note of June 12, after setting forth the American position in opposition to British reasons for failing to pay on June 1, explained that Great Britain had never made any suggestions for payment in kind and hinted that such payments might open an avenue for settlements.

The text of the British debt note follows:

After careful consideration of the note which you addressed to Sir Horace Lindsay on June 12, His Majesty's government in the United Kingdom feels there are two questions to which it may be useful to make further reference.

In the first place, His Majesty's government would observe that in their note of June 4 they did not state payment of the British war debt was legally contingent upon payment of the debts due to them. What they said was that it would be impossible for them to contemplate a situation in which they would be called on to honor in full their war obligations to others, while continuing to suspend all demands for payment of the war obligations due to them. This was a statement of law but of fact.

Secondly, as regards the proposed payments in kind, His Majesty's government would recall the experience of "Cem.," should such a transaction be not solved by a system in kind.

As the committee, presided by General Dawes, pointed out inada "In their financial effect, delinquency in kind are not really distinguishable from cash payment."

In fact, economic objections to cash payments would apply with equal force to deliveries in kind, unless those deliveries were to consist of indigenous products of the debtor country (excluding re-exports) and unless they were to be accepted by the creditor country and consumed by it in addition to the goods taken from the debtor country in the normal course of trade.

If the United Kingdom were not to receive payment in goods exported on commercial accounts, her exchange resources available to purchase cotton and other goods from America would be still further diminished. Therefore, while not unwilling to give further consideration to possibilities in this direction, His Majesty's government do not at the present see any method of putting such a plan into practice which would be likely to commend itself to the government of the United States of America.

In the view of His Majesty's government, the primary question for settlement is the amount that should be paid, having regard to all the circumstances of the debt.

They regret that up to the present it has not been possible to make further progress in this matter but they will welcome the opportunity of resuming discussion whenever it may appear that present abnormal conditions have so far passed away as to offer favorable prospects for a settlement. They are always anxious to remove from the sphere of controversy all or any matters which might disturb the harmonious relations between the two countries.

Awarded Scholarship

Toronto.—Toronto University Alumni Federation has awarded Canadian General Hospital Scholarship in faculty medicine valued at \$250 to Bertram James Woods, of Lemberg, Sask.

MACHINE GUNS SPRAY DEATH INTO THE BANKS OF HAVANA PARADEERS

Ten were killed and more than 20 wounded when machine gunners opened fire on a political parade of students in Havana, Cuba. This unusual picture shows the actual fighting shortly after the battle broke out. No. 1 designates the nest of machine gunners and the haven of some of the wounded. No. 2 is a man slain in the street. No. 3 shows some of the paradees who have taken refuge behind a lamp post and are returning the fire of the attack with their pistols. The cameraman risked his life to get this picture.

EDITORIAL

"RIGHTS" AND WRONG.

The president of a long established well conducted and highly regarded Canadian Business, writes a letter in which he says:

"None of us who have any business brains would countenance for one moment in our own business what has been going on with regard to the finances of our different governments.

I could never understand why bankers and investment houses treat governments so much differently than they do individuals or business corporations. For after all a nation is only a summary of individuals.

If I went to a bank and arranged a loan of \$10,000 for a year, and then at the end of the year went back and wanted to borrow \$5,000 more, the natural question that would be asked me would be—"Well, what do you want the second loan for?"

If I answered that I was going to use part of the proceeds to pay the interest on the first loan, my business relations with that bank would come to a sudden end. For they would know there could be only one ending to that kind of business.

But our governments do this same thing right along, and there does not seem to be much said about it. To continue it means financial chaos, and I for one, appreciate more than I can tell you the good work you are doing in supporting a plan for financial reform."

It makes a good editorial, that letter. Every business man, large or small, knows that what it says is true. Proof, if any is needed, lies in the financial morass in which some of the Provinces are now floundering. And in the taxes you pay on almost every commodity you buy.

The Dominion Government, in negotiating British loans, has made a praiseworthy step toward a reduction in the interest burden. Borrowing Provinces should benefit from that. The taxpayer should, too, if he insists on further measures.

Prudence in borrowing must be exceeded by prudence in spending and lending.

The Prime Minister has rightly imposed certain restraints on those provinces which are draining the Treasury. Are they sufficiently binding? Are they?

Plan of debt consolidation; a definite plan of reduction is vitally necessary. Part and parcel is the rigid control of spending and of budgets.

Financial "Rights" cannot be permitted to put a nation in wrong.

—Macleans.

HOUSE ECONOMICS

(T. J. in Glasgow Forward)

Bring out your cats so that they get a laugh.

Italy pays a heavy bonus upon all Italian wheat exported. Austria has a high duty upon all imported wheat. The idea being to encourage Austrian production of wheat.

So an Italian merchant at Trieste offered Italian wheat flour to an Austrian merchant and offered it for nothing provided only the Austrian would pay his own import duties and send the Italian back the receipted documents so that he would claim his export subsidy.

But the Austrian merchant figured the thing out. The offer of flour for nothing was indeed generous, but also, the import duty was to high. If he paid that import duty the flour would be dearer than the average Austrian price. So he could not take the flour for nothing.

The Italian had another examination of the mad-house economics governing the fiscal relations of the two countries.

His bounty upon export was so big that he discovered he could (a) give the wheat for nothing and (b) give a money present of 15 to 20 lire per quintal to the Austrian merchant if the Austrian would only take the wheat. If his hands and give him back the receipted documents.

But the joke has only begun.

Italy imports Hungarian wheat. And therefore under Dictator Mussolini, she (Italy) buys Hungarian wheat, and then pays a premium upon the export of Italian flour so high that it profits her merchants to give the flour away for nothing, plus a cash bonus, to the foreigner who accepts it.

No wonder the Man in the Moon winks down upon us all.

THESE TWO-LEGGED GROWLERS

In Calgary, a few days ago, we stood on 8th avenue watching a one-legged window washer perform his work.

The street was filled with two-legged people, both on and off relief, hurrying up and down, grousing about business, growling about the weather, seeking whom "they might destroy."

This one-legged worker balanced himself by hooping

the stump of his amputated leg over the handle bar of his crutch, leaving both hands free for his work.

Thus propped upon one leg and one crutch, he reached down to the pavement and scrubbed the gleaming wall of the shop he was cleaning. Tilting his crutch at an angle of forty-five degrees, he reached up three feet above his head and scoured the shining copper strip between the plate glass windows.

Stooping over with stump of a leg still hanging like a claw to the bar of the crutch, he wrung out his washing rags, wiped off the last film of moisture and then straightening up, still balanced on his crutch he shook out his drying cloths and finished his job as quietly, as efficiently, as unconcerned as though one leg was not buried in some rubbish heap in Flanders.

How dexterously he balanced his body to stoop down and reach up, to do an expert job at window washing. How easily and solidly he stood with his crutch leaning on as a brace to balance his body. It was a feat of agility worthy of a place in vaudeville, and yet it was a daily, hourly feat of his calling. He was earning his daily bread.

Walking away from the corner on two feet, the writer felt ashamed of the two-legged growlers of the world, to whom this brave window washer carried no lesson, no message.—Hanna Herald.

The New Patriotism

BY
REV. T. EDGAR ARMSTRONG, B.A.; B.D.
Pastor Wainwright United Church

Text: Psalm 124: 8-9. He shall have dominion also from sea to sea and from the river unto the ends of the earth. 1 John 4:20. If a man says, I love God and hate his brother he is a liar. Today is July 4—Dominion Day. We commemorate the sixty-seventh birthday of the Dominion of Canada. It affords me an unusual opportunity to say a word about patriotism. You all have heard that my first text is the Biblical basis for the name the Dominion of Canada. This land so closely resembled the prophecy that one of the fathers of Confederation, who was familiar with the scripture when they were searching for a name suggested the title the Dominion of Canada. We are known by that name today.

Sometimes I think that we are centuries behind in our ideal of real patriotism. You recall that the ancient conception of sacrifice was that of a dead victim. They presented their animals and children as dead sacrifices to their God. The Psalmist affirmed that our God (Jehovah) had no delight in burnt offerings; it remained for Hannah to conceive of presenting her child (Samuel) alive to the Lord. Hence we have the thought—a living sacrifice. For so long we have thought of patriotism that is highest experience, in dying for our country that we can scarcely conceive of what is involved in living for one's countrymen. The Athenian mother sent her son out to war and in presenting him with a shield said, "Come back with or on, but never without."

To speak of a new patriotism may sound radical but I feel that that is what we need at the present time. The need is urgent and apparent to many people. We live, like fawns, often forget their ancestors and put on airs which are not in keeping with the origin. To follow back the family line of words, as well as men, is often fruitful in results that are very instructive and suggestive. Now this word "patriot" has a noble ancestry. It roots itself in Greek, pater, father, and from that we have "patriotes" fellow countrymen.

The new patriotism which every soul of us needs is not so much love of country but love of countrymen. We have got to think more inwardly of life. Of those finer, deeper, worthier qualities. We hear the expression "we are living in a world gone mad." Now madness is a malady of the human mind. Sanity is associated with human nature. The world of things cannot go mad. We must think in terms of relations between men rather than man's relation to things which are not sensitive to his conduct. They are only the material out of which life and happiness are made, or with which we work.

I believe that a large number of the most thoughtful people are quite ready for a reversion to the ancient root meaning of the word patriotism—love of countrymen rather than love of country. I think there is a vast difference. I think I see the banishment of war and the correction of many ills. We lie for our country, scores have done so, and yet the land is of no value without husbandmen.

Politicians and militarists can paint in beautiful colors the possibilities of our land. It is a splendid subject for such reveries. It is indeed a marvellous land and if ever a country was worth dying for, Canada is, but let us recognize that our greatest asset the moral calling of our men and women. The real wealth of Canada lies in the character of its citizens. In the last analysis they will determine the ends, which are to be served by these goods of which we are so proud.

Let us check up. We hear people talk about their love for their country. That is well, but vastly more important is love for humanity. My church, when I mean a denomination, and my country when I mean the goods, material things, have a limiting fettering influence. Fellow countrymen goes over several churches and sects, and knows none of these divisive agencies.

Does not love of countrymen instead of love of country seem to be most rational statement of the case? What are many of the things which transpire under the old patriotism which could not be tolerated under the new? Will the new be a great corrective? What do you think of the patriot-

ism of men who pull flour in England at a profit and yet charge us who live where the wheat grows, an extra fifty cents a barrel because of tariff protection? Because of government enactments they take the last cent the business affords.

What do you think of men who sell to us, but if it is a foreigner or tourist they demand more. I lived close to a mining district and it was admitted that the merchants had two prices. One for the miners and another for non-miners. When your neighbor is your bound and foot does it require any special endowment of brains to take money out of his pockets? The answer is obvious.

A new conscience is dawning. We are asking how, from whom, and under what conditions does he make his money. In the old we were concerned a little with how he spent it. As I read in the Journal the list of firms conducting sweatshops (and I am wearing a suit made by one of those) I thought of that statement in Matthew 10:27. Nothing covered that shall not be revealed: hid that shall not be known. What ye hear in the ear proclaim on the house top. Men will have to let the public gaze upon their transactions and their deeds win approval there.

Another class of citizens who sorely need the new patriotism is the men whose business is founded upon the vices and weaknesses of their fellowmen. The instinct of the bird of prey is not to face the swift and strong in an open struggle but to keep watch upon the flock and strike down the young or sickly or unfortunate. I think now of the statement of the Brewer's agent "Unless we can attract the younger generation to take the place of the older men, there is no doubt we shall have to face a steadily falling consumption of beer." We want to get the beer drinking habit instilled into thousands, almost millions of young men, who do not at present know the taste of beer.

Now I am aware of the question in the back of your mind. Do you mean by that that people engaged in the liquor business and drugs and kindred trades are not patriots? They have been, but if we accept the new patriotism they shall not be. They shall be known as traitors and enemies of their country for they traffic in that which blights homes and robs the country of its foremost asset—Men and women of full-blooded lives.

The new patriotism likewise will reach out of its ranks men who make gain at the misfortune of others. You may regard me as an impractical idealist, but I repeat what I have previously said with the hope that repetition may register an impression in your mind. The spirit of the gambler is everything for the least I can give. It is diametrically opposed to the spirit of the cross which gives the most for the least. Gambling breaks down lower endeavors. Think of this slogan we heard in the real estate boom. "Make more money in one real estate deal than you can in a life of labor." In that statement you see the trend of those times. We recognize those men as boosters for the country but are not so sure but that they did infinite harm to the west.

What shall we say of them under the new patriotism? Further what shall we say concerning the political parasites, men who bring shame to government positions. My blood wants to boil when I think of the men who make huge fortunes in the days of the war under government patronage when others were giving their sons. Several have since been knighted. These men farmed the people and the state for private gains.

Perhaps through all this you think I am too severe on the man. Back of the man lies the system. How can I show you the old patriotism unless I use these as concrete examples of its outworking or of what can transpire under it. To me it all points to the necessity of the new patriotism—love of countrymen.

I recognize that the ideal is high, but I trust you accept it as a worthy ideal and the conduct I have suggested, by contrast, as the conduct of the real patriot.

Our finer manhood recoils from some of the things which I have described. We number them as "Man's unhumanity to Man."

John said "If a man says he loves God and hates his brother he is a liar." What must be our esteem of our fellowmen against whom we perpetrate these deeds.

How we do need that new patriotism! A patriotism which embraces God and man and expresses itself in thoughtful brotherly conduct.

Since beginning to write, "The New Outlook" has arrived. Permit me a quotation from the editorial which aptly supports my thought. Speaking on Canada's birthday. "We pride ourselves on our patriotism; but we ought not to forget that a true patriot not only loves his country but loves the people of his country, his friends and neighbors and fellow citizens, and loving them, is ever ready to be friendly and helpful toward them. There never was a better and a greater opportunity for making our patriotism concrete and actual than comes to us today."

Our text is His Dominion shall stretch from sea to sea—This psalm was a prophecy concerning the reign of a righteous king. He saw his way, and beneficent rule at work. We think of dominion in terms of geography. Let us make a correction in our thinking and square it with the Psalmist.

Under the new patriotism, Dominion Day celebrations shall have as part of their programme the assembling of all the citizens who attained full citizenship in the past year, and the congratulating them on their great honor and privilege which is theirs. Each honor has its accompanying responsibility and these shall be pointed out. We shall challenge youth to the great adventure of living and serving in the world of affairs without offering himself as a dead sacrifice.

Men thus challenged should respond and their life service will merit the approval of men and the love of God.

Under the old, men thought they could evade God and by the strong hand prevent men from scanning their deeds but in the new men must be prepared to have all their deeds brought under the scrutinizing eyes of Men and God.

Should we be prepared for what lies ahead, if so, let us recognize what God expects by way of conduct to our fellow man.

"If a man says he loves God and hates his brother he is a liar." Let us all be truth-speakers and labor for the new Patriotism.

Let us make Canada great by the rule of God in all our affairs.

Preached, July 1st, 1934.

The Marketing Bill

By The Record's Correspondent
At Ottawa

Just what are the principal points of the Marketing Bill, or the Natural Products Marketing Act, 1934, to give it its official title? It is a measure designed to secure for farmers in Canada a more orderly marketing system than at present prevails, one that will open up to their financial advantage without unfairness either to distributors or consumers. It aims to prevent manipulation or exploitation and to provide machinery for regulating the movement of products in such a way as shall tend to stabilize prices.

The Bill does not make provision for price-fixing or restricting production. It proposes to establish a Dominion Marketing Board to regulate the marketing of natural products which will co-operate with local boards and any marketing board or agency established by a provincial government to regulate the marketing of any natural product.

A representative number of persons engaged in the production and marketing of a natural product may petition the Dominion Government and submit a scheme to regulate the marketing of such a natural product by a local board which will function under the supervision of the Dominion Marketing Board established in Ottawa. The local board will be a creation of those who desire such a board in a given area and will be administered by them through persons whom they elect to the Board. This board under authority of the Dominion Board may have power to collect charges or tolls from persons engaged in production or marketing of regulated products, to establish a fund for the necessary expenses of the board and the creation of reserves or the pooling of returns. The Board will also have power to withhold a product from the market or to forward it to a specific market and may pay compensation or sustained on an order of the Board, but no compensation shall be paid in the case of a regulated product which had because the grade is considered unsuitable, for a particular market or because of government restrictions applying to the importation of a product which is competing with a product subject to regulation by a board, and also power to restrict the export of products from Canada when it is in the interests of producers to impose such a restriction.

Part 2 of the Bill provides for the determination by investigation of what may be termed a fair spread for the marketing of a natural product and also that persons who charge in excess of such an amount shall be subject to certain penalties. Representations have been received from farmers & their organizations, first in Western Canada and later in Eastern Canada, stressing the necessity of the Dominion Government enacting marketing legislation and the Marketing Bill is therefore designed to meet their needs.

It is evident, therefore, that the Marketing Bill is a democratic measure to meet the considered and expressed desire of the farmers throughout Canada.

The bill also gives the Government power to restrict the importation of a product which is competing with a product subject to regulation by a board, and also power to restrict the export of products from Canada when it is in the interests of producers to impose such a restriction.

Part 2 of the Bill provides for the determination by investigation of what may be termed a fair spread for the marketing of a natural product and also that persons who charge in excess of such an amount shall be subject to certain penalties. WORLD HAPPENINGS
BRIEFLY TOLD

New motor cars on the roads of the United Kingdom in March numbered 43,785 as compared with 53,746 in March, 1933.

Charles S. Thomas, 64, who capped a stormy career as United States senator and governor of Colorado by defeating President Roosevelt's 1933 order against gold hoarding, is dead. Canada's greetings were extended to the Prince of Wales on the occasion of his birthday, June 23, by the Governor-General, the Earl of Bessborough.

Henry Lawson Royle, 16, attempting his first flight, at Herby airport, Yorkshire, crashed and was hurled to death 10 minutes after the take-off.

Dr. Wm. Boyd, professor of pathology in Manitoba Medical College, has accepted a similar position in Stanford University, California, it was announced. He will leave Winnipeg late in August.

The International Institute of Agriculture, estimated that the drought will cause European wheat harvest this year to fall short of 1933 by 260,000,000 bushels. The 1934 harvest is expected to total 1,470,000,000 bushels.

Rt. Rev. Ernest William Barnes, Bishop of Birmingham, declared at a peace service in London, that Great Britain should disarm even though she is alone among powers in doing so. Any alternative policy, he argued, might lead to war.

The Rotarians, 10,000 of them, were welcomed to Detroit, representing 80 nations and nearly as many languages and political philosophies, they assembled for the 29th convention of Rotary International.

Nowak Kazimierz, Polish newspaperman, who left Warsaw many years ago to get material for a book, has arrived at Cape Town after peddling across Europe and down the length of Africa on a bicycle.

Chinese Were Acquired

Alleged Lottery Tickets Were Poems By Confucius

Poems written by the great Chinese philosopher, Confucius, cannot, by any stretch of the imagination, be based as lottery tickets. Judge Lacroix ruled when he dismissed thirteen actions against as many Chinese for operating lot-

teries. He found that the tickets counted how they had paper containing numbers and had been in drawing would take certain dates. The slips, he said, were lottery tickets.

Confucius, the Chinese philosopher, asked the witnesses, who had affirmed.

The slips were turned over to a Chinese scholar, who examined them and announced with a smile that they were fragments from the poems of Confucius.

In rendering judgment, Judge Lacroix pointed out that three essentials were necessary to establish a lottery, the ticket, the prize and the drawing. There was no evidence of a ticket, none of a prize and none of a drawing. Judge Lacroix ruled in dismissing the action.

Never Shows Correct Time

Silesian City Clock Has Been Fast For 650 Years

Corlitz claims a distinction which is probably unique. A clock in this ancient Silesian city has not shown correct time for over 650 years. In 1953 a conspiracy was alleged to murder the councillors as they left the town hall at noon. Conscience, however, overtook one of the conspirators, and he put the clock forward seven minutes. As a result, the would-be assassins arrived on the scene too early and were arrested by the watch. To-day the clock is still kept seven minutes fast in memory of the councillors' escape.

Through With Speed Flying

Capt. Frank Hawks, famous aviator, on a visit to Detroit, revealed that he is through breaking airplane speed records. "Speed flying is a crafty stuff now," he explained. "Safe flying is the real job confronting 'air pilots.' Capt. Hawks has been in China in the interest of an American aircraft company. He was in Detroit to take delivery of a new aerodynamic automobile.

Java is one of the most thickly populated places in the world; 40,000,000 people occupy its less than 90,000 square miles.

Set Up Laboratories

On Mountain Peaks

Scientists With Opposing Views Will Study Cosmic Rays

Two Colorado mountain peaks towering more than 14,000 feet above sea level, have been chosen as laboratories for two groups of famous scientists for the study of the much-discussed cosmic rays.

Dr. Joyce C. Stearns of Denver; R. D. Bennett of Massachusetts Institute of Technology; and Dr. K. E. Bowman of McDonald College, Canada, will conduct experiments atop Mount Evans in the Denver mountain park.

Dr. Robert A. Millikan of Pasadena, whose theories regarding the cosmic rays are in many respects opposed to those of Dr. Compton and his associates, will set up his equipment on top of Pike's Peak, near Colorado Springs.

Trained Engineers Needed

Good News For Graduates Of School Of Mines

There never has been a time in history when the need for highly trained technical engineers has been greater than now, Former United States Senator Tasker L. Oddie of Nevada told members of the 1934 graduating class of the Colorado School of Mines.

"World competition," he said, "is growing more keen in the production of the metals especially, and the balance of success will go to that country whose technical progress in the field of invention and improved methods of treatment has made the greatest advancement."

ASSISTING NATURE

By JACK MINNER

During the past year I have read a number of articles, both in magazines and newspapers, as well as many letters that have come to me, on the subject of "Nature Balance," describing actions or systems on the part of man which the writers described as "interfering with Nature," "upsetting Nature's balance," and so on. To all who adopt that attitude I should like to put myself on record to the effect that, personally, I believe the so-called "balancing" of Nature was left entirely with man, and that I believe in assisting Nature for the benefit of humanity. God created everything—everything and He created man "in His own likeness and gave him dominion over all"; that is, as I understand it, the power and authority to manage everything here on earth.

Look, for instance, at the animal world, with the livestock in the farmer's barnyard as example. Did God create the Jersey cow, and the Holstein, and the Hereford? No. He gave them the original stock and then God, through man's instrumentality, developed many breeds, some for the high cream content of their milk, some to produce the greatest quantity of milk, and some as the best beef cattle. All have been on the earth a long time, of course; but their differences are the result of man's management. And, remember, man had to interfere with Nature to develop them.

Much the same thing is true of the horse, different strains being cultivated for particular purposes, such as the Clydesdales and Percherons for heavy draught work, and the blue-blooded descendants of original Arab stock for racing.

Recently I was in some of the southern United States, where the character of the farm work to be done is too heavy for the common ass, yet where the climate is too warm to permit of the horse doing its best. In that part of the continent, therefore, man has crossed the ass with his common horse and produced a beast that withstands the heat and is also strong enough to do the work of tilling the soil. Yes, he has developed the mule. But the mule kicked and, so far as I know, has gone no farther.

In poultry, if you trace back the various species it is very easy to see that it has been the work of man that has developed the different breeds—Leghorns, Brahmas, Minorcas, Plymouth Rocks, and so on—some of which are especially valuable as layers, and others as food. Our much-prized turkey is nothing more nor less than the wild turkey, domesticated and improved.

Seventy-five years ago our Canadian North-west was grazed by millions of wild buffalo (Bos bison). Then came the white man who, realizing the value of the fertile soil, established a park where a herd was placed to preserve the species from extinction, slaughtered the great roaming herds and turning the land upside-down, made it into one of the largest and most valuable of earth's great wheat-fields, with towns and cities and stately governmental buildings dotted here and there across its

vast expanse. Remember, though, that, in order to bring about this state of things, man had to "interfere with Nature" as some would call it.

And speaking of wheat-fields, wheat has been man's favorite food for centuries. Yet wheat, even as it was being grown in Canada in comparatively recent years, had certain weaknesses—it had to be planted in the fall and did not always survive the severity of the Western winter; it was not producing as abundantly as seemed most desirable; it did not mature rapidly enough always to escape the early autumn frosts. Then came to our aid such men as Professor Charles Saunders, creator of Ottawa, and by study, experimentation and the rigid selection of choice grains, developed a wheat that could be planted in the spring, that would yield several bushels more per acre than had been the rule previously, that would mature within a certain period of time, and that yet retained all its former qualities. We have today the Marquette and the Garret and other species of wheat, developed by man. God created the original, which is the Canadian thistle. Still He used—the power to develop, manage and control it.

Or if you will consider your flower garden, look at the iris. God gave to us in America a little, insignificant flower growing along the banks of streams which we called, commonly, the "flag." From it man has developed irises that grow three or four feet in height, varied in color, and some giving out an exquisite fragrance. But man had to interfere with Nature to accomplish this. Or take the rose. Did God create the American Beauty rose? He gave man brains, and a little old wild rose which served as the germ, so to speak. To-day, through the efforts of outstanding botanists, man has been given flowers of beauty and fragrance, as the Creator intended should be done.

But let me look at another side to the question. At the same time that God created the little wild rose, He created also the weed typical of which is the Canadian thistle. Still He gave to man the brains and the means of controlling these also, so that they may be restrained from predominating the plant world. In your orchard are many varieties of fruit. Did God create the Stark Delicious apple, the Northern Spy, and other varieties? No. He gave man the little wild crab, and the hawthorne, which is a miniature apple or germ, and from these man developed what we have to-day. Yet, according to some people's statements, if you kill the mice that gnaw these fruit trees when they are small, you are "interfering with, or upsetting, Nature's balance."

If you are raising poultry, or other bird life, and have begun to destroy and live on the birds, and you fail to take a gun and shoot the hawk, that you are not using the brains God gave you.

If your clothing were to become infested with vermin or you were to have rodents who would destroy the insects or animals that were trouble-

ing you. Yet (if they were constant in their argument) these people would have to maintain that in doing so you were "upsetting Nature's balance," since God created all these creatures at the same time. Or how about the fly, carrier of typhoid? Do you control it or, preferring not to disturb "Nature's own," let it live? Personally, I am glad He gave man "dominion over all" these things.

Indeed, one is moved to ask the question: What would our animal world, our farms and orchards and gardens—our whole world—be like if man had not assisted Nature? Yet the very minute the white man discovered this continent, came ashore, cut down a tree and began to develop North America into a garden for hundreds of millions of people, that man, according to some, disturbed the balance of Nature.

As for me, I thank God for all He made—for the raw materials He gave us with which to work; that He made us in His own likeness, after His own image, and endowed us with sufficient brains to develop those raw materials and keep on discovering and bringing within reach of us all the blessings He created. To illustrate my meaning, allow me to quote the poem, "Making a Garden," written by Ida M. Thomas:

Man ploughs and plants and digs and weeds,
He works with hoe and spade;
God sends the sun and rain and air,
And thus a garden's made.

He must be proud who tills the soil
And turns the heavy sod!
How wonderful a thing to be
In partnership with God!

I say, He wants all of us to be partners.

Little Journeys In Science

THE ICE AGES

(By Gordon H. Guest, M.A.)

Niagara Falls and the Great Lakes, vacation paradise to many from the western plains, are legacies left to us from the last great ice age, which enveloped this continent many thousands of years ago. Once looked upon as great catastrophes because they destroyed life and defaced the earth's surface, the ice ages are now considered by geologists to have been not entirely destructive.

It is thought that there have been four "ages of ice" in the geological history of the world, each lasting for many thousands of years, and bringing about great changes in the earth's surface. The last ice age is believed to have covered about 12,000,000 square miles, and of this, 6,000,000 square miles is still under ice. It is notable, however, that the world was never entirely covered with ice at one time, and thus life was always preserved, to spread again when the ice disappeared.

Geologists refer to an ice age, as a time when ice encrusts large areas of the earth's surface and all forms of life in these regions become extinct. The condition is brought about by "ice caps," huge blocks of ice formed by piles of snow which partially melt, congealing to form ice, and slowly spreading farther and farther.

It is believed that it was in the melting of these great ice caps that the Great Lakes and Niagara Falls were formed, the peculiar rocky and uneven nature of the earth's surface retaining the water as it melted.

The hemlock tree is not poisonous, the "hemlock" poison made famous by Socrates being derived from a plant similar to the wild carrot and containing poison in root, stem, leaf and seed.

A woman's intuition is more powerful than a man's knowledge.

SUNDAY SCHOOL LESSON

JULY 8

ASA RELIES ON GOD

Golden Text: "The Lord is my helper; I will not fear: What shall man do unto me?" Hebrews 13:6. Lesson: II. Chronicles, Chapters 14-16.

Devotional Reading: Psalm 21-5.

Explanations and Comments

The Prophet Azariah's Counsel. 2 Ch. 15:1-7. The Spirit of God came upon the prophet Azariah, the son of Obed. In Old Testament times the word spirit refers to God's power. As Azariah, the king of Judah, was returning victorious from his engagement with Zerah, the Ethiopian (14:9-15), Azariah went out to meet him. Instead of greeting him with words of congratulation and praise, he solemnly warned him that he must remain loyal to God. "Hear ye me, Assa," he said, "and all Judah and Benjamin (the tribes over which Assa was king): Jehovah is with you, while ye are with him; and if we seek him he will be found of you; but if ye forsake him, he will forsake you." He told them plainly upon what terms they stood with God. Let them not think that, having won the victory, all was their own forever; no; he must let them know they were upon their good behavior. Let them do well, and it will be well with them, otherwise not! (Matthew Henry). Compare David's counsel to Solomon, 1 Ch. 29:8.

Assa's Reformers. 15:8. Encouraged by Azariah's words (probably the words of Azariah, the son of Obed) dropped out of the text in copying, or Obed is a mistake for Azariah, Assa put away the abominations, destroyed the idols, and did away with the degrading heathen rites, out of all the land of Judah and Benjamin and out of the cities which he rather Abijah had taken (2 Ch. 13:19) from the tribe of Ephraim. How much such a reformation was needed we realize when we read that Maachah, the queen mother, had erected an image of Ashtoreh, Jerusalem. Assa and the image ground to dust and buried in the Valley of the Widron, and he deposed the queen. Assa rebuilt the altar of burnt offerings which had been erected before the temple sixty years earlier.

Recipes For This Week

(By Betty Barclay)

SUMMER LEMONADE

6 lemons
1 cup sugar
6 cups cold water

Lemon slices

Extract lemon juice, add sugar, and stir until dissolved. Then add water and serve immediately, pouring into glasses over crushed ice (not too much ice for children). Place a lemon slice over the rim of each glass. By dissolving the sugar in the lemon juice before adding the water, you will acquire the real "knack" of lemonade making.

CORN FLAKE PASTRY

1 cup corn flake crumbs
2 tablespoons butter
2 tablespoons sugar

Put the corn flakes (4 cups full) through a food grinder, using the fine cutter. Then sift the crumbs. Measure crumbs after sifting. Cream the butter with the sugar and add the crumbs, kneading thoroughly. Press into the bottom of mold, or a pie pan.

Man has done more in the last 5,000 years to alter the earth's surface than Nature has done in five million years.

About 14,000 persons made contributions to finance Admiral Byrd's present trip to the South Pole.

SAFeway STORES

NEW LOW PRICES!

Mr. and Mrs. Hometown have found that the good news is really true. As a result of improvements in an already highly efficient system of food distribution, SAFEWAY STORES HAVE adopted a new policy of UNIFORMLY LOWER PRICE throughout the store!

"WILD BOAR PLOW SHARES" "THE SHARE WITH THE WEAR" GUARANTEED NOT TO BREAK NOTHING NEW!

Wild Boar Shares are made of special ALL-HARDENED Steel. The landside is solid with the share, and of the same wear-resisting material.

The blade is thin, stays sharp. It is estimated the draft is 25% less than on other makes. If you will call and examine this share, and compare it alongside of any other make—YOU will buy no other.

News About Town

Miss Madeleine Gadd, of Hardisty, is holidaying with Miss Elaine Wright.

The Count-On-Me class of the United Church Sunday School, spent a pleasant evening at the home of Mrs. Shearer on Tuesday, June 26th to honor their teacher, Miss Janet Cain, before her departure. Contests and games were played, Miss Rosalie Callas being the very efficient Mistress of Ceremonies.

A very dainty lunch was served by the girls during which Miss Cain was presented with a small gift from her class with best wishes for her future life.

Those present were: Mrs. Shearer, Miss Cain, Misses Betty Shearer, Rosalie Callas, June McNally, Florence Durrant, Elaine Wright, Mrs. McNally and Mrs. Wright.

Miss Etta Yull, of British Columbia, has been visiting her relatives, Mr. and Mrs. Albert C. McLellan at the Park. She left last week for Nova Scotia to visit friends at Colchester, Pictou and Halifax, before returning to the west.

On Wednesday evening of last week two cars loaded with members of the Wainwright Lodge I. O. O. F. journeyed to Chauvin to fraternize with the Lodge there. It being the occasion of the installation of D.D. G. Master by the Grand Master Bro. O. S. Martin, of Hardisty, assisted by the outgoing occupant of the office, Bro. C. Wilbraham, of Irma.

After breaking his neck when diving in Pigeon Lake nearly two years ago, Arnie Dickson, of Calgary, is now almost completely recovered.

Mrs. Louise Stott and Marjorie left on Saturday night for a vacation visit to her former home at Duluth, U.S.A.

Wife—"The night before last you came home yesterday. Last night you came home to day. If you come home tomorrow tonight, there'll be trouble."

Dick McKay and Bill Pigeon are rivals for the honor of having the first new potatoes from their garden. They had them for dinner on June 27th. We hope they enjoyed them.

Muriel Wittman has gone to Edmonton to attend summer school.

Mrs. Cumming went East on Saturday.

Several of our local boys donned Khaki and left for Sarcee Camp on Saturday. An extra coach was attached to the afternoon train for the accommodation of all would-be soldiers along this line. Those going from Wainwright were: Lieut. Guim, Sergt. Snyder, Privates, Tom Smith, Jack Goddard, Eddie Walker and Dan Taylor.

The natty uniforms and crowds of admiring females reminded us of 1914 and after.

Mr. and Mrs. Singleton, of Killarney, were in town on Monday, on their way home from a visit in Saskatchewan.

Miss Edna Reich, who has been employed in Edmonton for a number of months, will be home this week for her summer vacation.

Miss Petra Tollefsrud left on Monday morning by train for Vancouver where she will make her future home.

Mrs. J. Hetherington and Mrs. Larsen, of the Aurburndale District, left on Saturday night to spend a month in Ontario.

Mr. Alex Everett, of Aurburndale, left last week to spend a few weeks in Eastern Canada.

Mrs. Alex Morrison, of Kinmount, Ontario, is visiting her son, Ronald, at Greenshields.

Camille Dupre has sold his garage business in Viking and is spending a few days visiting his parents before leaving with his wife for a motor trip to the Coast.

Mrs. King has a bath house built at King's Park and her resort is becoming more popular each year.

Oliver Murray and family have left for a motor trip to Spirit River. On their return they intend taking in the Edmonton Exhibition. The trip will take over three weeks.

Mr. and Mrs. MacNamara, of Edmonton, are visiting the latter sister, Mrs. Ray Greer, for a few days.

Silver Lane, Strawberry Plains and Lewisville Annual Picnic, eight miles south of Irma on July 18th. A full line of Sports. Ladies bring baskets. Tea and coffee supplied. Everybody welcome. Dance in Strawberry Plains School.

Miss Cain went to the Coast this week for her vacation.

Mr. and Mrs. J. C. MacKenzie left on Tuesday for Jasper where they will spend a two weeks vacation.

Miss Agnes Nicholson, teacher at Ascot school, is visiting her parents at Sidney Mines, Cape Breton.

Clarence Rowe was a visitor in Alliance and Killarney on the weekend. He brought two of his children back to Wainwright with him for the vacation.

Mr. King left on Friday for his summer vacation.

George Gregson left this week to join Mrs. Gregson, who has been spending some time at the Coast.

Mrs. W. E. Washburn spent some time at Bassett last House Party given by the Oxford Group and also at Lethbridge attending Eastern Star Convention. She returned on Monday.

A heavy hail storm visited the West District last week and did considerable damage to the crops.

Miss Lydia Bruce, of the Record Staff, was a visitor at her home, in Alliance over the weekend.

Mrs. Jas. Guthrie is holidaying at the Coast.

Mrs. William McKay, Sr., is spending two weeks in Edmonton with friends.

Miss Bertha Love spent the weekend in Hardisty with her parents, Rev. and Mrs. Love and from there she went to Edmonton for a few days.

Oddfellows and Rebekahs observed Memorial Day on Sunday last when a large number met in the Hall at 2:30 and journeyed to the Cemetery where Rev. Bro. Brooker conducted the service. A solo "The Old Rugged Cross" Sister Carzell and a duet by Sisters Huntington and Carzell, accompanied by Bro. Carzell on the organ.

E. E. Adair passed through town the other day on his way east. He expects to be back in about five weeks and will stop over for a short time.

J. T. Alexander brought in a sheaf of Bromo to the Record office on Thursday last which measured three feet eleven inches tall.

HEATH HAPPENINGS

Miss Jacquette Logan who has spent the past two months here attending Arm Lake School left on Tuesday morning for Andrew where she will join her mother.

Miss Mary Brown, of Arm Lake, left on Tuesday to spend her vacation attending summer school at the Edmonton University.

Heath and Arm Lake schools held a joint picnic Friday afternoon. Owing to weather conditions the crowd gathered in front of the local store instead of the chosen ground. In spite of small attendance a good time was had by all.

Mr. and Mrs. Arthur Peterson and family, left for Wetsaskwin on Saturday to spend a few days holidaying with Mrs. Patterson's relatives.

A severe hailstorm struck the district south of Heath on Thursday afternoon, ruining many gardens and damaging crops to considerable extent. The hail stones while not especially large, fell thick and fast, remaining on the ground until the following morning.

Ensign and Mrs. Ramsey are visiting with Mrs. Ramsey's mother, Mrs. Fred Lowe.

Gilt Edge and Battle Creek schools held their annual joint picnic at Clear Lake on Saturday afternoon. Three large truckloads attended and spent a very enjoyable afternoon.

Winnie Victor Vail is still confined to hospital in Edmonton, he is reported to be recovering satisfactorily.

Greenshields Elevators will be closed for the summer holidays as follows.

Northern closed from July 8 to 22. Searle closed from July 15 to 31. Pool closed from July 15 to 31.

Victor and Lawrence Goulet left this week for a motor trip to California and expect to be away all summer.

On Saturday evening a squad of Horseshoe artists came down from Viking with designs on the Cup 2-7 held by the Wainwright Twisters. The invaders comprised about a dozen men, all set to bear the trophy home with them. Unfortunately it began to rain before the contest was more than half completed and the visitors had to give up the attempt, Wainwright at the time the games were called, being considerably in the lead. We look forward to another visit soon.

Mrs. Oliver Hannah and son, Collis, left on Sunday for a holiday at the Coast.

Mr. and Mrs. Alfred Peterson are visitors at the home of E. R. Frickleton.
